

Project Design Phase-II

Technology Stack (Architecture & Stack)

Date	19 February 2026
Team ID	LTVIP2026TMIDS80013
Project Name	Plugging into the Future: An Exploration of Electricity Consumption Patterns Using Tableau
Maximum Marks	4 Marks

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

Example: Order processing during pandemics for offline mode

Reference: <https://developer.ibm.com/patterns/ai-powered-backend-system-for-order-processing-during-pandemics/>

Guidelines:

- Include all the processes (As an application logic / Technology Block)
- Provide infrastructural demarcation (Local / Cloud)
- Indicate external interfaces (third party API's etc.)
- Indicate Data Storage components / services
- Indicate interface to machine learning models (if applicable)

S.No	Component	Description	Technology
1	User Interface	Dashboard interface for viewing electricity consumption trends	Tableau Public, html, css
2	Application Logic-1	Script for data cleaning and formatting	Python(Pandas, NumPy)
3	Application Logic-2	Data reshaping and exporting for Tableau	Python
4	Database	Processed CSV/Excel files	Local Filesystem
5	Cloud Database	N/A – Static files used in Tableau	N/A
6	File Storage	Stores preprocessed datasets	Local Storage
7	External API-1	Open energy datasets	data.gov.in, Kaggle
8	External API-2	Weather correlation data (optional)	OpenWeather API
9	Machine Learning Model	Optional forecasting model (future scope)	Prophet / Scikit-learn
10	Infrastructure	Application setup and dashboard hosting	Local preprocessing + Tableau Cloud

S.No	Characteristics	Description / Technology
1	Open-Source Frameworks	Python (Pandas, NumPy), Tableau Public
2	Security Implementations	Tableau's built-in access control and published link privacy
3	Scalable Architecture	Scalable via Tableau's support for large datasets and filters
4	Availability	High availability via Tableau Public's cloud-hosted platform
5	Performance	Fast rendering through preprocessed and optimized data, cache-enabled dashboards
